Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' amendment filed December 20, 2004, and the remarks/arguments therein. Applicants have shown by way of calculation that U.S. Patent 4,231,959 to Obrecht, the primary reference relied upon in the rejections of record, teaches a process for preparing phosgene, wherein the carbon tetrachloride content of said phosgene is about 311 weight-ppm, which is a substantial difference from the phosgene produced according to the process of the present invention, having a carbon tetrachloride content of less than 150 weight-ppm. The examiner agrees with applicants' further contention that it would not have been obvious to a person of ordinary skill in the art to modify the pressure of the process taught by Cicha et al, the secondary reference of record, with the expectation of lowering the carbon tetrachloride content of the phosgene thus prepared. Accordingly, the examiner has withdrawn the rejections of record; the instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.
